PROJECT

User Management System (Mini Project) - [View](#)

Users can login and register to the system, having an admin dashboard to watch and edit each user's information. - completed using NodeJS-Express with Nosql DBMS via Mongoddb connected with Mongoose for Express. New users can register themselves and login having authentication with DB as well as admins with proper authorization levels.

Netflix Sign Up - UI (Hobby Project) - [View](#)

Netflix sign - up page with pure HTML, CSS and responsiveness attained via media queries.

Facebook Log In - UI (Hobby Project) - [View](#)

Designed Facebook's login page and completed responsiveness.

BPT - Karikku -UI (Hobby Project) - [View](#)

Designed an employee login page for Bhaskaran Pillai Technologies (hypothetical)

CAN Integration in PULPissimo (UG - Major Project)

Integrated CAN protocol onto the PULPissimo which can communicate with the CAN nodes easily. From an electric vehicle perspective, CAN resolves a lot of conflicts between the system and interconnections.
